Title

NZ Airport Points (Topo, 1:500k)

Date

Abstract

A facility where aircraft can take off and land; usually consists of hard-surfaced landing strips, a control tower, hangars and accommodation for passengers and cargo Data Dictionary for airport\_pnt: [http://apps.linz.govt.nz/topo-data-dictionary/index.aspx?page=class-airport\\_pnt](http://apps.linz.govt.nz/topo-data-dictionary/index.aspx?page=class-airport_pnt) This layer is a component of the Topo500 data. The Topo500 map series will, when it is created, provide updated topographic mapping for the New Zealand mainland at 1:500,000 scale.

Purpose

The NZMS 242 series was primarily created as a topographic base for aeronautical charting. When using Topo500 data, please be aware of the following: 1. The existence of a road or track does not necessarily indicate public right of access. 2. Permits may be required to visit some sensitive and special islands and areas. Contact the Department of Conservation to see if you need to apply for a permit.

##### Statement

LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for more than a hundred years. The first digital data at 1:500,000 was created in 2009 by generalising the Topo250 data. At present, only the digital data is available, LINZ has not produced new maps from the updated data. Printed maps (the NZMS 242 series) first published in the 1980's are available. These will be withdrawn once printed Topo500 maps are published.
