

NZ Shingle Polygons (Topo, 1:50k)

Title
| NZ Shingle Polygons (Topo, 1:50k)

Creator
| LINZ - Land Information New Zealand

Date
| 2009-09

Description
| Crushed rock, shells etc larger than 2mm in size Data Dictionary for shingle_poly:
| https://docs.topo.linz.govt.nz/data-dictionary/tdd-class-shingle_poly.html This layer is a component of the
| Topo50 map series. The Topo50 map series provides topographic mapping for the New Zealand mainland,
| Chatham and New Zealand's offshore islands, at 1:50,000 scale. Further information on Topo50:
| <http://www.linz.govt.nz/topography/topo-maps/topo50>

Source
| LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for
| more than a hundred years. The first digital data at 1:50,000 was created in the late 80's and early 90's by
| scanning the 1:50,000 maps that existed at the time (known as the NZMS 260 series, which replaced the
| imperial NZMS 1 series at 1inch to 1 mile) The raw data was created by photogrammetrists who from
| 1974 to 1997 mapped the country from overlapping pairs of aerial photographs. Cartographers then took
| the data and added symbols and text, and created the colour separations needed to produce the printed
| maps. From 1994 to 2006 LINZ used orthophotos to update the map data. Today the map data is updated
| primarily from aerial and satellite imagery, and data supplied from Department of Conservation, Transit
| NZ and others. LINZ releases regular updates of the Topo50 maps and data; for details refer
| <http://www.linz.govt.nz/topography/topo-maps/topo50/update-history> Some features are subject to change
| more than others. For example in any given map revision, it is likely that road data will undergo more
| change than, for example, fumeroles. However, all data is examined during a full data revision.
