

# NZ Topo250 Maps

## Title

NZ Topo250 Maps

## Creator

LINZ - Land Information New Zealand

## Date

2009-09

## Description

The Topo250 map series provides topographic mapping for the New Zealand mainland, the Chatham Islands at 1:250,000 scale. Along with the paper-based Topo250 map series, digital images of the maps are also publicly available. Georeferenced raster digital images are provided at a resolution of 300 DPI. Georeferencing allows adjacent maps to be accurately and automatically aligned within GIS systems. For more information, and a description of the georeferencing keys: <http://www.linz.govt.nz/topography/topo-maps/topo250/digital-images>

## Source

LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for more than a hundred years. The first digital data at 1:250,000 scale was created in the late 80's by scanning the 1:250,000 maps that existed at the time (known as the NZMS 262 series, which replaced the earlier NZMS 18 series) The NZMS 262 series were generalised from the NZMS 260 series. The Topo250 map series were compiled from a mix of information from the NZMS 262 series, and that from the Topo50. In future, LINZ will release regular updates of the Topo250 maps and data. Details will be posted at <http://www.linz.govt.nz/docs/topography/250-sheet-history.xls>
