Title

NZ Snares Island/Tini Heke Lake Polygons (Topo, 1:25k)

Date

Abstract

Any standing body of fresh inland water. Data Dictionary for lake_poly:
http://apps.linz.govt.nz/topo-data-dictionary/index.aspx?page=class-lake_poly
Although captured and presented at 1:25,000 this layer, for all intents and purposes,
forms part of the Topo50 map series. Further information on Topo50:
<http://www.linz.govt.nz/topography/topo-maps/topo50>

Purpose

Permits may be required to visit some sensitive and special islands. Contact the
Department of Conservation to see if you need to apply for a permit. When using
Topo25 data, please be aware of the following: 1. The existence of a road or track
does not necessarily indicate public right of access. 2. The Department of
Conservation should be contacted for the latest information on tracks and huts. 3.
Not all aerial wires, cableways and obstructions that could be hazardous to aircraft
are held in the data. 4. Contours and spot elevations in forest and snow areas may
be less accurate.

Statement

LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for more than a hundred years. The first digital data for the NZ Offshore Islands at 1:25,000 and 1:50,000 was created in the late 80's and early 90's by scanning the maps that existed at the time (the NZMS 272 series). The raw data was created by photogrammetrists who from 1974 to 1997 mapped the islands from overlapping pairs of aerial photographs. Cartographers then took the data and added symbols and text, and created the colour separations needed to produce the printed maps. The first Topo50 (2011) version of the Snares Island comprised a conversion to AKTM2000 Projection only. Edition 2.0 released in May 2014 included corrections to positional accuracy of islands and improved definition of coastline.
