

NZ Campbell Island/Motu Ihupuku Cliff Edges (Topo, 1:50k)

Title
| NZ Campbell Island/Motu Ihupuku Cliff Edges (Topo, 1:50k)

Creator
| LINZ - Land Information New Zealand

Date
| 2011

Description
| A high, steep or overhanging face or rock. Can be rock. Data Dictionary for cliff_edge:
| https://docs.topo.linz.govt.nz/data-dictionary/tdd-class-cliff_edge.html This layer is a component of the
| Topo50 map series. The Topo50 map series provides topographic mapping for the New Zealand mainland,
| Chatham and New Zealand's offshore Islands, at 1:50,000 scale. Further information on Topo50:
| <http://www.linz.govt.nz/topography/topo-maps/topo50>

Source
| LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for
| more than a hundred years. The first digital data at 1:50,000 was created in the late 80's and early 90's by
| scanning the 1:50,000 maps that existed at the time (known as the NZMS 260 series, which replaced the
| imperial NZMS 1 series at 1inch to 1 mile) The raw data was created by photogrammetrists who from
| 1974 to 1997 mapped the country from overlapping pairs of aerial photographs. Cartographers then took
| the data and added symbols and text, and created the colour separations needed to produce the printed
| maps. In 2009 and 2010 LINZ used satellite imagery and data supplied from the Department of
| Conservation to update the offshore islands data. Printed maps (in hardcopy and digital form) in are also
| available.
