Identification Info**Data Identification****Citation****Citation****Title**

NZ Auckland Island River Centrelines (Topo, 1:50k)

Date**Abstract**

A natural, flowing body of water emptying into an ocean, lake or other body of water and usually fed along it's course by converging tributaries. Data Dictionary for river_cl: https://docs.topo.linz.govt.nz/data-dictionary/tdd-class-river_cl.html This layer is a component of the Topo50 map series. The Topo50 map series provides topographic mapping for the New Zealand mainland, Chatham and New Zealand's offshore Islands, at 1:50,000 scale. Further information on Topo50: <http://www.linz.govt.nz/topography/topo-maps/topo50>

Purpose

Permits may be required to visit some sensitive and special islands. Contact the Department of Conservation to see if you need to apply for a permit. When using Topo50 data, please be aware of the following: 1. The existence of a road or track does not necessarily indicate public right of access. 2. The Department of Conservation should be contacted for the latest information on tracks and huts. 3. Not all aerial wires, cableways and obstructions that could be hazardous to aircraft are held in the data. 4. Contours and spot elevations in forest and snow areas may be less accurate.

Lineage

LI_ Lineage
Statement
LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for more than a hundred years. The first digital data at 1:50,000 was created in the late 80's and early 90's by scanning the 1:50,000 maps that existed at the time (known as the NZMS 260 series, which replaced the imperial NZMS 1 series at 1inch to 1 mile) The raw data was created by photogrammetrists who from 1974 to 1997 mapped the country from overlapping pairs of aerial photographs. Cartographers then took the data and added symbols and text, and created the colour separations needed to produce the printed maps. In 2009 and 2010 LINZ used satellite imagery (KiwImage) and data supplied from the Department of

Conservation to update the offshore islands data. Printed maps (in hardcopy and digital form) in are also available.
