

## NZ Auckland Island Rock Polygons (Topo, 1:50k)

Title  
| NZ Auckland Island Rock Polygons (Topo, 1:50k)

Creator  
| LINZ - Land Information New Zealand

Date  
| 2011

Description  
| Coastal rocks; rocks between high and low tide Data Dictionary for rock\_poly:  
| [https://docs.topo.linz.govt.nz/data-dictionary/tdd-class-rock\\_poly.html](https://docs.topo.linz.govt.nz/data-dictionary/tdd-class-rock_poly.html) This layer is a component of the  
| Topo50 map series. The Topo50 map series provides topographic mapping for the New Zealand mainland,  
| Chatham and New Zealand's offshore Islands, at 1:50,000 scale. Further information on Topo50:  
| <http://www.linz.govt.nz/topography/topo-maps/topo50>

Source  
| LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for  
| more than a hundred years. The first digital data at 1:50,000 was created in the late 80's and early 90's by  
| scanning the 1:50,000 maps that existed at the time (known as the NZMS 260 series, which replaced the  
| imperial NZMS 1 series at 1inch to 1 mile) The raw data was created by photogrammetrists who from  
| 1974 to 1997 mapped the country from overlapping pairs of aerial photographs. Cartographers then took  
| the data and added symbols and text, and created the colour separations needed to produce the printed  
| maps. In 2009 and 2010 LINZ used satellite imagery (KiwImage) and data supplied from the Department  
| of Conservation to update the offshore islands data. Printed maps (in hardcopy and digital form) in are  
| also available.
