

NZ Bounty Islands Rock Polygons (Topo, 1:25k)

Title
| NZ Bounty Islands Rock Polygons (Topo, 1:25k)

Creator
| LINZ - Land Information New Zealand

Date
| 2011

Description
| Coastal rocks; rocks between high and low tide Data Dictionary for rock_poly:
| https://docs.topo.linz.govt.nz/data-dictionary/tdd-class-rock_poly.html Although captured and presented at
| 1:25,000 this layer, for all intents and purposes, forms part of the Topo50 map series. Further information
| on Topo50: <http://www.linz.govt.nz/topography/topo-maps/topo50>

Source
| LINZ and our predecessors have been responsible for national topographic mapping in New Zealand for
| more than a hundred years. The first digital data for the NZ Offshore Islands at 1:25,000 and 1:50,000 was
| created in the late 80's and early 90's by scanning the maps that existed at the time (the NZMS 272
| series) The raw data was created by photogrammetrists who from 1974 to 1997 mapped the islands from
| overlapping pairs of aerial photographs. Cartographers then took the data and added symbols and text,
| and created the colour separations needed to produce the printed maps. In 2009 and 2010 LINZ used
| satellite imagery and data supplied from the Department of Conservation to update the offshore islands
| data. Printed maps (in hardcopy and digital form) in are also available.
