Statement

The project area covered the Selwyn DC, Ashurton DC & Timaru DC districts. The Aerial Surveys sruvey number for this project is SN13479. Digital imagery was collected between 30 Oct 2012 - 28 March 2013, using Aerial Survey's Microsoft UCLp large-format digital cameras. The imagery was collected flying at 4,700 metres above ground. Because no field verification has been undertaken it is always recommend the user to field verify any data to be used for design purposes. Aerotriangulation was performed using control points which have been surveyed in Feb 2013, and LINZ benchmarks which have resurveyed since the Feb 2011 earthquake. All Features are derived from a Photogrammetric process unless otherwise shown. An automated DEM was produced photogrammetrically over the extents of the photography.
