

Landonline: Feature Name Point

Title

Landonline: Feature Name Point

Creator

LINZ - Land Information New Zealand

Date

2013-09

Description

****Please read:**** This layer is part of the comprehensive Full Landonline Dataset and is designed for use only by data professionals who require the complex version of our property ownership and boundary data for advanced uses. ***** This layer stores names associated with features and includes Streams, Rivers, Mountains, etc. Its main function is the storage of place name points from NZTopo to enable ad-hoc spatial searches within Landonline. For full Feature Name data, see the Landonline: Feature Name Polygon layer. Please refer to the [LDS Full Landonline Data Dictionary and Models] (<https://data.linz.govt.nz/document/95>) for detailed metadata about this table.

Source

Sourced from the Landonline database system which was made operational in 2001.
