Abstract

This layer includes all Crown Land and Properties managed by LINZ which have been identified spatially and can include properties managed by LINZ on behalf of other agencies. The attributes in this dataset are derived from the National Property and Land Information System (NaPALIS), which is a centralised database for all Land Information New Zealand (LINZ) and Department of Conservation (DOC) administered land. The boundaries of many properties are linked to the applicable Landonline Primary Parcel(s), but in some cases the boundaries may have been drawn in as unsurveyed parcels to varying degrees of accuracy. As such please note that the boundaries are indicative only. The layer excludes any LINZ managed properties which do not have an identified location or extent. More information on

Crown Property can be found under the [Crown Property section] (<http://www.linz.govt.nz/crown-property>) on the LINZ Website. A subset of Crown Property can be found in the [South Island Pastoral Leases layer] (<https://data.linz.govt.nz/layer/1572-south-island-pastoral-leases/>). A table of Property associations to Primary Parcels is published in the [LDS here] (<https://data.linz.govt.nz/table/3450-property-parcel-association/>).

Purpose

This layer shows the location of current LINZ and Client Agency Property from NaPALIS.

Statement

This layer sources its information from the NaPALIS system, which includes LINZ properties and LINZ managed properties from other agencies. Data in the layer is updated through internal processes including acquisition or disposal of land. In some instances data may be out of date or the incorrect parcel identified. Properties are linked to corresponding primary parcel(s) where available, or in some instances to unsurveyed parcels when the boundaries have been identified in land status checks and are made up of part parcels. Land is managed under the Crown Forest Assets Act, Pastoral Legislation, Land Act and the Public Works Act as well as other legislation.
