NZ Quasigeoid 2016 Raster

Alternate Title

NZGeoid2016 Raster

Date**Date****Date****Abstract**

New Zealand Quasigeoid 2016 Raster, provides users with a one arc-minute gridded (approximately 1.8 kilometres) raster image of the New Zealand Quasigeoid 2016 (NZGeoid2016). The relationship between the GRS80 ellipsoid and the New Zealand Vertical Datum 2016 (NZVD2016) is modelled by [NZGeoid2016] and is represented by the attribute "N", in metres.(<http://data.linz.govt.nz/layer/3418>). NZVD2016 is formally defined in the LINZ standard [LINZS25009] (<http://www.linz.govt.nz/regulatory/25009>). **Users may also be interested in transforming heights to any of the 13 historic local vertical datums used in New Zealand using the appropriate datum relationship grid displayed in the [NZ Height

Conversion Index](<http://data.linz.govt.nz/layer/3419>).** More information on these transformations is available [on the LINZ website] (<http://www.linz.govt.nz/data/geodetic-services/coordinate-conversion/converting-between-nzvd2016-nzgd2000-and-local-vertical-datums>).

Purpose

The New Zealand Geoid 2016 Raster (NZGeoid2016 Raster) provide a raster image of the New Zealand Geoid 2016 (NZGeoid2016).

Statement

From June 2016 NZVD2016 has replaced New Zealand Vertical Datum 2009 as New Zealand's official vertical datum. The reference surface for NZVD2016 is NZGeoid2016, this is also provided a raster format as the NZGeoid2016 Raster layer. NZGeoid2016 Raster is published on a one arc-minute grid (approximately 1.8 kilometres) over the New Zealand continental shelf (160° E to 170° W, 25° S to 60° S).
