

Landonline: Parcel Topology Dataset

Title
| Landonline: Parcel Topology Dataset

Creator
| LINZ - Land Information New Zealand

Date
| 2013-04

Description
| ****Please read:**** This dataset is comprised of multiple layers and tables from the [Full Landonline Dataset] (<https://data.linz.govt.nz/group/full-landonline-dataset/>) and is designed for use only by data professionals who require the complex version of our property ownership and boundary data for advanced uses. For simplified versions of the more commonly used data, see our [simplified data layers] (<https://data.linz.govt.nz/data/category/property-ownership-boundaries/>). ********* The dataset includes data related to parcel topology information which is the intermediate “building blocks” for parcel polygons, and enables you to download multiple layers and tables at the same time. Please refer to the [LDS Full Landonline Data Dictionary and Models](<https://data.linz.govt.nz/document/11095-lds-full-landonline-data-dictionary-and-models/>) for detailed metadata about data in this dataset.

Source
| Sourced from the Landonline database system which was made operational in 2001.
