## Abstract

**\*\*Please read:\*\*** This dataset is comprised of multiple layers and tables from the [Full Landonline Dataset](<https://data.linz.govt.nz/group/full-landonline-dataset/>) and is designed for use only by data professionals who require the complex version of our property ownership and boundary data for advanced uses. For simplified versions of the more commonly used data, see our [simplified data layers](<https://data.linz.govt.nz/data/category/property-ownership-boundaries/>).

\*\*\*\*\* The dataset includes data related to nodes and survey monuments (marks), and to survey and geodetic adjustments that have been carried out within Landonline, and enables you to download multiple layers and tables at the same time. Please refer to the [LDS Full Landonline Data Dictionary and Models](<https://data.linz.govt.nz/document/11095-lds-full-landonline-data-dictionary-and-models/>) for detailed metadata about data in this dataset.

## Purpose

The Full Landonline Dataset is specifically intended to cater for those users who have a requirement to access large volumes of data on a regular basis. The extract allows the recipient to recreate the database held in Landonline. It does not enhance the data in any way, other than to make it available in a standard formats. Entire

table views are exported. Consequently, the extracted data covers the entire country, rather than individual areas or pre-defined geographic extents.
