Abstract

**\*\*Please read:\*\*** This is the Address Range Road table and is part of the [set of NZ Roads tables](https://data.linz.govt.nz/set/88). The Address Range Road table provides an identifier that groups one or more Road Sections that have a non-standard address range. This currently includes roads that consist of multiple address ranges. The address range values are not held or provided as part of this dataset. The NZ Roads dataset includes eight data tables and eleven lookup tables. The dataset has been sourced from LINZ's NZ Roads database, a database for the management of national roads, including those managed for addressing purposes. This set of normalised tables replaces the Landonline: Road Centre Line layer and the Landonline: Road Name and Landonline: Road Name Association tables currently published on LDS. These centrelines are required to indicate the presence of an authoritative road name. Named centrelines are not intended to represent the exact location of a road formation. Named centrelines do not indicate the presence of legal access. For a simplified version of the data contained within these tables see [NZ Roads (Addressing)](https://data.linz.govt.nz/layer/3382), which aggregates geometries based on road name, and [NZ Roads Subsections (Addressing)]

(<https://data.linz.govt.nz/layer/3383>), which holds the individual geometries. Please refer to the [NZ Roads Data Dictionary](<https://data.linz.govt.nz/document/1628>) for detailed metadata and information about this layer.

**Purpose**

This table is part of a set of related data tables and associated look-up tables and provides more complex road information designed for advanced applications.
