Landonline: Statistical Area

Date

Abstract

****Please read:**** This table is part of the comprehensive Full Landonline Dataset and is designed for use only by data professionals who require the complex version of our property ownership and boundary data for advanced uses. ***** Statistical Areas are areas definable as an aggregation of meshblocks. The areas defined here are those that are required for electoral purposes, e.g. territorial authorities, general electorates, and maori electorates. This unload only contains TA entries, that may be linked to a Survey plan. Please refer to the [LDS Full Landonline Data Dictionary and Models](<https://data.linz.govt.nz/document/95>) for detailed metadata about this table.

Purpose

The Full Landonline Dataset is specifically intended to cater for those users who have a requirement to access large volumes of data on a regular basis. The extract allows the recipient to recreate the database held in Landonline. It does not enhance the data in any way, other than to make it available in a standard formats. Entire table views are exported. Consequently, the extracted data covers the entire country, rather than individual areas or pre-defined geographic extents.
