

AIMS: Address Reference

Title	AIMS: Address Reference
Creator	Toitū Te Whenua Land Information New Zealand
Date	2016-11-21
Description	<p>**Please read:** The AIMS: Address Reference table is part of the [set of comprehensive AIMS Address tables](https://data.linz.govt.nz/set/87). Address Reference provides the relationship between Address data and other related datasets including Roads, Parcels, and Localities. While the Roads and Parcels are managed by LINZ and available on LDS, Localities data is owned by the NZ Fire Service. The comprehensive address dataset includes eight data tables and nine lookup tables. The dataset has been sourced from LINZ's Address Information Management System (AIMS), a centralised database for the management of national addresses, including for electoral purposes. This set of normalised tables replaces the single Landonline: Street Address layer currently published on LDS. This layer contains information advised to LINZ by Territorial Authorities (TAs). [Under the Local Government Act 1974 (section 319)](http://www.legislation.govt.nz/act/public/1974/0066/latest/DLM420385.html) it is the responsibility of the TAs to advise LINZ (the Surveyor General) of all allocated addresses in their district. For a simplified version of the data contained within these tables see [NZ Street Address] (https://data.linz.govt.nz/layer/3353). Please refer to the [Street Address Data Dictionary] (https://data.linz.govt.nz/document/1627) for detailed metadata and information about this layer.</p>
