AIMS: Addressable Object Lifecycle Stage

Date**Date****Date****Abstract**

****Please read:**** This is the look-up table for Addressable Object Lifecycle Stage and is part of the [set of comprehensive AIMS Address Tables](https://data.linz.govt.nz/set/87). The Addressable Object Lifecycle Stage look-up table is used by the following tables; AIMS: Addressable Object. The comprehensive address dataset includes eight data tables and nine lookup tables. The dataset has been sourced from LINZ's Address Information Management System (AIMS), a centralised database for the management of national addresses, including for electoral purposes. This set of normalised tables replaces the single Landonline: Street Address layer currently published on LDS. This layer contains information advised to LINZ by Territorial Authorities (TAs). [Under the Local Government Act 1974 (section 319)] (<http://www.legislation.govt.nz/act/public/1974/0066/latest/DLM420385.html>) it is the responsibility of the TAs to advise LINZ (the Surveyor General) of all allocated addresses in their district. For a simplified version of the data contained within these tables see [NZ Street Address] (<https://data.linz.govt.nz/layer/3353>). Please refer to the [Street Address Data Dictionary] (<https://data.linz.govt.nz/document/1627>) for detailed metadata and information about this layer.

Purpose

This look-up table is part of a set of related data tables and associated look-up tables and provides more complex address information designed for advanced applications.
